Subject Index

A

Adenosine, inosine, and adenine on the concentration of organic phosphate and electrophoretic component (B) of human red cells during storage of blood in acid-citrate-dextrose and citrate-phosphate-dextrose, the effect of 254
Affected with a public interest—an address ... 360
Albumin antiglobulin technic in antibody detection, evaluation of the 184
enriched cell suspensions, the anti-globulin reaction on 344
American Association of Blood Banks, standards and accreditation programs of the 107
Antibodies, irregular, occurring in healthy donor sera, incidence of 350
Antibody detection, evaluation of the albumin antiglobulin technic in 184
Antiglobulin test, a simple manifold washing process for the preparation of erythrocytes for the 286
Anti-human globulin reagents, a further control in the use of 556
Anti-Js^a, another example of 359
Anti-Kp^a, a further example of 89
Anti-M, the frequency and properties of *p*H-dependent 322
Anti-Tj^a-like hemolysins in relation to obstetric history, distribution of the various blood groups and the occurrence of immune Anti-A or Anti-B hemolysins among aborters and nonaborters, a comparative observation of the presence of 327

B

Blood bank deficiencies 471
collections, uniformity in—a statement prepared by the committee on blood transfusion problems 307
donor information, a data retrieval system for the 543
donors, the motivations of 559
group A, interrelationship of the various subgroups of, study with immunofluorescence 223
group systems, somatic mutation affecting the Rhesus and Duffy 6
groups, Simian, another blood group system, C-E-F, in chimpanzees 508
groups, simian, two "new" blood factors of gibbon blood, A^g and B^g 235
reactive, in a transfusion service, the disposition of STS 452
transfusion, the bleeding complications of 1
transfusion, the risk of transmitting toxoplasmosis by 447
transfusion therapy, evaluation of 82
units, fate of—a retrospective study 192

Book Reviews

Bleeding in the Surgical Patient. Conference of The New York Academy of Sciences, 1963, Ed. by Harold E. Whipple 291
Clinical Haematology in Medical Practice, 2nd Ed., by G. C. de Gruchy 570
Disseminated Intravascular Coagulation. An Intermediary Mechanism of Disease, by Donald G. McKay 569
Fibrinolysis, British Medical Bulletin *20* (3) 95
Laboratory Methods in Blood Coagulation, by James W. Eichelberger, Jr. 291
Proceedings of the Ninth Congress of the International Society of Blood Transfusion, Mexico 1962, Ed. by L. Holländer 199
Progress in Hematology, Vol. IV. Ed. by C. V. Moore and E. B. Brown 474
The Clinical Use of Dextran Solutions, by Amiel Segal 199
The Porphyrias, by Geoffrey Dean 95
Transplantation of Tissues and Organs, Ed. by L. Brent 570

C

Caucasians, the Kidd blood group system in .. 506
Children, a clinical evaluation of the use of citrate-phosphate-dextrose solution in 427
Chimpanzee isohemagglutinins by immunization with human erythrocytes, production of 71
Chimpanzees, the V-A-B blood group system of, a paradox in the application of the 2 x 2 contingency test 64
Citrate-phosphate-dextrose solution in children, a clinical evaluation of the use of 427
Civil war, blood transfusion in 92
Cohn fractionator, the age of human erythrocytes lost during freezing and thawing with glycerol using the 421
Cold precipitated antihemophilic globulin (Factor VIII, CPAG), clinical use of 533

D

Deficiencies, blood bank 471
Donor sera, healthy, incidence of irregular antibodies occurring in 350

E

Effects of various technics of concentrating platelets, response to transfusion of platelets pooled from multiple donors and the 54
Electronic computer simulation, guide to inventory levels for a hospital blood bank determined by 465

Erythrocytes by saponin hemolysis, enhancement of immunofluorescent staining of 434
for the antiglobulin test, a simple manifold washing process for the preparation of 286
fresh and stored human, the synthesis of pyridine nucleotides in 412
human, lost during freezing and thawing with glycerol using the Cohn fractionator, the age of 421
preserved with glycerol, effect of resuspension medium *in vivo* survival and supernatant hemoglobin of 25

F

Factor XI *in vitro* and *in vivo*, survival of ... 539

G

Glycerolized frozen blood, observations on recipient plasma hemoglobin concentration after transfusion with 36

H

Hemagglutination, a study of the forces involved in the second stage of 158
Hemoglobin, supernatant, in deglycerolized, resuspended erythrocytes, the *in vivo* survival, mode of removal of the non-viable cells, and the total amount of 273
Hemolytic disease of the newborn, complement fixing antibodies in relation to 216
Historical milestones—blood transfusion in the Civil War 92
Hydroxyethyl starch and dextran, prolonged bleeding times and hypofibrinogenemia in dogs after infusion of 440
Hypofibrinogenemia in dogs after infusion of hydroxyethyl starch and dextran, prolonged bleeding times and 440

I

Immunization with human erythrocytes, production of chimpanzee isohemagglutinins by 71
Immunofluorescent staining of erythrocytes by saponin hemolysis, enhancement of 434
Immunohematology, complement in 211
laboratory, identification of blood stains in the 78
Improved blood shipping container, design and test considerations to provide an 550
Indians, Venezuelan, Inc (a) serum factor in .. 457
Inventory levels for a hospital blood bank determined by electronic computer simulation, guide to 465

K

Kell blood group system, evidence that Sutter belongs to the 309
Kidd system, the minus-minus phenotype in the 315

L

Laboratory, immunohematology, identification of blood stains in 78
Lactose, dextran and albumin on recovery and survival of frozen red cells, effect of 399
Leukocyte antigen, specific; identification of a—another presumed example of 5^b 135

M

Method of obtaining sterile pilot sample when drawing blood into plastic containers, a 554
Memoir, Mark Falcon Lesses 305

N

Newborn, complement fixing antibodies in relation to hemolytic disease of the 216
Non-immune auto-agglutinating property of serum, a further example of 461

O

Open heart surgery, a simplified technic of .. 149
isoimmunization after massive transfusion for 153
Osmotic fragility and *in vivo* survival of autologous deglycerized resuspended red blood cells, relationship between 267

P

Parentage, disputed, titration and scoring in .. 248
*p*H-dependent Anti-M, the frequency and properties of 322
Plastic containers, a method of obtaining sterile pilot samples when drawing blood into ... 554
Platelet factor 3 activity, the effect of dextran on: *in vitro* and *in vivo* studies 109
as a means of demonstrating immune reactions involving platelets, change in—its use as a test for quinidine-induced thrombocytopenia 336
Platelets pooled from multiple donors and the effects of various technics of concentrating platelets, response to transfusion of 54
Preservation of red cell ATP, effect of *p*H on 11
President—AABB—1965-66—E. Arthur Dreskin, M.D. 489
Proteolytic enzymes of streptomyces griseus (Protease G) in blood banking, the use of a 11
Pyridine nucleotides in fresh and stored human erythrocytes, the synthesis of 412

R

Recipient plasma hemoglobin concentration after transfusion with glycerolized frozen blood, observations on 36
Red cell ATP, effect of *p*H on preservation of 17
destruction in the absence of demonstrable antibodies *in vitro*, increased 525
Red cells and plasma for survival studies of stored blood, simultaneous determination of the volume of 143
frozen, effect of lactose, dextran and albumin on recovery and survival of 399
Rh factor after twenty-five years, the 490
Rh_{null} blood, a second example of ---/--- or 492
Rh variants $\mathfrak{R}h_o$, the serology of 230
Rhesus and Duffy blood group systems, somatic mutation affecting the 6

S

Sera of women who have developed Anti-Rh antibodies, on the incidence of second antibody populations in 355
Serum enzyme determinations to detect anicteric hepatitis, the use of 120
of children and adults, antibodies to gamma globulin in the 516
Streptomyces griseus (Protease G) in blood banking, the use of proteolytic enzyme of .. 11
STS reactive blood in a transfusion service, the disposition of 452
Supernatant hemoglobin of erythrocytes preserved with glycerol, effect of resuspension medium on *in vivo* survival and 25

T

Toxoplasmosis by blood transfusion, the risk of transmitting 447
Transfusion, massive, for open heart surgery, isoimmunization after 153

U

Urine, human, blood group antibodies in 240

X

XX/XY mosaicism, two populations of erythrocytes associated with 501

Abstracts

Blood Groups and Antibodies

A case of very weak B agglutinogen, by M. Kout and P. Totin 202
A contribution to the immunochemistry of M and N substances, by A. Vacikova and M. Kout 202
A human blood group antigen, Ny^a (Nyberg), segregating with the *Ns* gene complex of the MNSs system, by H. Orjasaeter, *et al.* 97
A method for differentiating homozygous from heterozygous secretors of ABH blood-group substances; its application to the study of secretor status in rheumatic fever, by E. Kaklamanis, *et al.* 97
A new variant of blood group A, by T. E. Reed and B. L. P. Moore 200
A note on the relatively high frequency of St^a on the red blood cells of orientals, and report of a third example of Anti-St^a, by H. J. Madden, *et al.* 204
A possible relationship between the blood group antigens Sm and Bu^a, by M. Lewis, *et al.* 204
A second example of ---/--- blood or Rh_{null}, by P. Levine *et al.* 571
A study of the distribution of incomplete rhesus antibodies among the serum immunoglobulin fractions, by B. E. Dodd and P. C. Wilkinson 571
An unusual Rh gene complex producing a weak c antigen, by B. Broman *et al.* 476
Anti-M in neoplastic disease, by I. Dunsford .. 202

Blood group antigens and cross-reacting antibodies in primates including man. I. Production of antisera for agglutinogen M by immunization with blood other than human type M blood, by A. S. Wiener, *et al.* 97
Blood groups of apes and monkeys. II. The ABO blood groups, secretor and Lewis types of apes, by A. S. Wiener, *et al.* 202
Blood groups of apes and monkeys. IV. The Rh-Hr blood types of anthropoid apes, by A. S. Wiener, *et al.* 203

B_v—A sub-group of B which lacks part of the normal human B antigen, by K. E. Boorman and R. A. Zeitlin 201

Cell antigen and cell specialization. II. Demonstration of some red cell antigens of human normoblasts, by J. J. and E. J. Yunis 477
Cell antigens and specialization. IV. On the H blood group antigen of human platelets and nucleated cells of the human bone marrow, by E. J. and J. Yunis 475
Characterization of the enzyme from *trichomonas foetus* that destroys the serological specificity of blood group A substance, by G. J. Harrap and W. M. Watkins 475

Déficit de l'antigène H érythrocytaire chez une malade leucémique de phénotype A faible, by C. Salmon, *et al.* 201
Development of an acquired blood group antigen in surgical patients with peritonitis due to escherichia coli, by W. Burns *et al.* 571

Erythrocytic antigenic determinants characteristic of H, I in the presence of H[IH], or H in the absence of i[H (-i)], by R. E. Rosenfield *et al.* 202

Five examples of red cells with the A_x subgroup of blood group A, by A. G. H. Voss.. 201
Further observations on the blood group antigen Bu^a, by M. Lewis, *et al.* 204

Heterogeneity of A^p antigen in pig red blood cells: Significance for detection of human "immune" Anti-A, by M. Yokoyama and H. H. Fudenberg 96
Human blood group factors in non-human primates, by J. Moor-Jankowski 572

Identification of the predicted blood group antibody Anti-Yt^b, by C. M. Giles and M. N. Metaxas 204
Immunochemical studies of the Rh system. I. Isolation and characterization of antibodies, by S. Kochwa and R. E. Rosenfield 97

Immunochemical studies of the Rh system. II. Capacity of antigenic sites of different phenotypes to bind and retain Rh antibodies, by R. E. Rosenfield and S. Kochwa 98
Immunochemical studies on blood groups. XXXII. Immunochemical properties of and partial structures for the blood group A, B, and H antigenic determinants, by G. Schiffman, *et al.* 96
Inhibition of Rh antibodies, by W. H. Pearse and C. Hobel 476
Isoimmunization of a D^u patient by Rh positive blood, by F. W. Chorpenning 476

Kidd and Duffy typings without Coombs serum. Adaptation of the auto-analyzer hemagglutination system, by F. W. Allen, *et al.* 203

Lewis blood types, by A. S. Wiener 572

Mycoplasma (pleuropneumonia-like organisms) and blood group I: Associations with neoplastic disease, by P. J. Schmidt, *et al.* 477

Notations for two weak A variants: A_{end} and A_{e1}, by P. Sturgeon, *et al.* 200
Nouvel exemple d'une famille où le phénotype A_m est observé dans 2 générations, by C. Salmon, *et al.* 200

Observations on the specificity of Anti-O and Anti-A_1 sera, by E. R. Gold 202

Possible suppression of Rh-antigens in only one generation of a family, by C. M. Giles and B. Bevan 203

Quantitative hemagglutination studies of the D (Rh_o) antigen in erythroblastosis fetalis, by T. J. Greenwalt, *et al.* 571
Quantitative studies of the phenotype A_{e1}, by J. M. Solomon and P. Sturgeon 200

Reactions of M and N blood-group substances natural and degraded with specific reagents of human and plant origin, by E. Romanowska 571
Rh alleles, $R^{-10, 20}$, and new evidence for $R^{2, 4}$, by R. E. Rosenfield, *et al.* 476

S_2, a new phenotype in the MN blood group system, by J. K. Hurd, *et al.* 203
Simian-type blood group factors in non-human primates, by J. Moor-Jankowski 572
Specific inhibition of Anti-Rh antibodies by extracts from twigs of angiospermous plants, by G. F. Springer and H. Tegtmeyer 477
Spécificité liée a un antigene du locus Rh,Ee, des γ-globulines auto-anticorps d'anémie hémolytique acquise, by C. Salmon, *et al.* 203
Stillbirth due to Anti-U, by T. J. Degnan, *et al.* 476
Stimulation of isohemolysins and isohemagglutinins by influenza virus preparations, by G. F. Springer and R. Schuster 571
Studies in immunochemistry. 23. Some observations on the heterogeneity of preparations of human blood-group-specific substances, by A. Pusztai and T. T. J. Morgan 475
Studies on "cross-reacting" isoagglutinins, by M. Yokoyama and H. H. Fudenberg 475
Studies on the Ny^a blood group antigen and antibodies, by H. Orjasaeter, *et al.* 475
Studies on the Wright blood group system, by M. N. Metaxas and M. Metaxas-Buhler 204

The effects of ficin on the reaction between Anti-D and red cells, by N. C. Hughes-Jones, *et al.* 203
The histological distribution of the blood group substances in man as disclosed by immunofluorescence. III. The A, B, and H antigens in embryos and fetuses from 18 mm. in length, by A. E. Sulzman 96
The identification of Anti-I agglutinins in human serum: An atypical antibody which simulates a nonspecific cold agglutinin, by R. Jakowicz and R. T. Simmons 477
The inheritance of blood groups in the blood group system B in cattle, by J. Bouw, *et al.* 97
The X-linked blood group system Xg: II. Still more tests on unrelated people and on families, by J. Gavin, *et al.* 477
The Xg blood group system: Data on 294 white families, mainly Canadians, by B. Chown, *et al.* 477
Transmission of the blood group genotype pp (Tj^a-negative) in a kinship with multiple consanguineous marriages, by M. L. Catino, *et al.* 571
Trisomy and titrations with particular reference to the MN system, by S. D. Lawler, *et al.* 203
Trois phénotypes "B faible": B_{80}, B_{60}, B_0 définis par leur agglutinabilité camparée à celle du phénotype normal "B"$_{100}$ by C. Salmon and J. Reviron 201
Two examples of the Rh genotype *CdE/CdE* R_y R_y in a Swiss family, by M. N. Metaxas. 476
Unexplained inheritance of the Xg groups in two families, by R. Sanger, *et al.* 204
Unusual inheritance of ABO group in a family with weak B antigens, by H. Seyfried, *et al.* 201
X-linked ichthyosis and the Xg groups, by C. B. Kerr, *et al.* 572
Xg blood groups of Chinese, by Wong Hock, *et al.* 477

Blood Groups and Disease

Hereditary aspects of duodenal ulceration: Serum-pepsinogen level in relation to ABO blood groups and salivary ABH secretor status, by W. B. Hanley 98
Red blood cell groups and ABH secretor system as genetic indicators of susceptibility to rheumatic fever and rheumatic heart disease, by T. B. Dublin, *et al.* 478

Coagulation

A clinical and family study of hereditary proconvertin (factor VII) deficiency, by C. A. Hall, *et al.* 296
Clinical aspects of congenital factor VII deficiency, by V. J. Marder and N. R. Shulman 296
Congenital deficiency of factor VII (hypoconvertinemia). Critical review of literature and report of three cases, with extensive pedigree study and effect of transfusions, by C. A. Owen, Jr., *et al.* 295
Durée de Vie du Facteur Hageman (Facteur XII), by F. Josso, *et al.* 295

Hemostasis in factor V deficiency, by W. P. Webster, *et al.* 295
High-potency antihaemophilic factor concentrate prepared from cryoglobulin precipitate, by J. G. Pool, *et al.* 295
Modern aspects of the treatment of haemophilia. III., by S. van Creveld, *et al.* 295
The use of epsilon-aminocaproic acid in the management of dental extractions in the hemophiliac, by W. O. Reid, *et al.* 295

Donors

Sickle-cell trait in blood donors, by M. Kaufman, *et al.* 481

Extracorporeal Circulation

Chemical and hypothermic inhibition of intravascular sludging in extracorporeal circulation, by D. Sachs 101
In vitro studies on the danger of use of mixed bloods for open-heart surgery, by R. Schrek and W. E. Neville 479
The prophylactic use of fresh frozen plasma after extracorporeal circulation, by A. S. Trimble, *et al.* 101

Hemolytic Anemia

A simple serological test for antibodies causing ABO-haemolytic disease of the newborn, by M. J. Polley, *et al.* 478
Amniocentesis: A possible immunizing hazard, by J. T. Queenan and D. W. Adams 479
Auto-immune Anti-D specificity in infancy, by S. Gross and A. J. Newman 478
Hemolysis in immune rabbits of autologous erythrocytes modified with common enterobacterial antigen, by T. Suzuki, *et al.* 98
Hemolytic disease of the newborn due to ABO incompatibility: A study of the use of group O erythrocytes in AB plasma, by D. L. Goldfard, *et al.* 478
La spécificités des auto-anticorps d'anémie hémolytique acquise, by C. Salmon 478

Hemolytic Disease of the Newborn

A search for natural selection in six blood group systems and ABH secretion, by T. E. Reed, *et al.* 292
Efficiency of exchange of transfusion determined by pre- and postexchange fetal hemoglobin concentration, by B. F. Andrews and R. I. Feinbloom 293
Erythropoietin levels in the amniotic fluid, particularly to Rh-immunized pregnancies, by P. H. Finne 293
Exchange transfusion in utero, by V. J. Freda and K. Adamsons, Jr. 293
Influence of foetal A and B blood-group substances on the immunization of pregnant women, by H. Høstrup 292
Multiple intraperitoneal transfusions of the fetus for erythroblastosis fetalis, by J. M. Bowman and R. F. Friesen 293
Obstetrical management of Rh incompatibility based on liquor amnii studies, by J. P. Alvey 292
Risk of fetal death to mothers of different ABO and Rh blood types, by H. B. Newcombe ... 292
Severe erythroblastosis fetalis in first immunized pregnancies, by M. E. Erlandson and J. M. Haber 292
The prognosis of neonatal haemolysis due to A-B-O incompatibility without exchange transfusion, by E. Fohl and O. Lombos 572

Immunology

Auto-agglutination in albumin, by D. E. B. Powell and C. Rees 575
Blood group antibody activity among γ1A-globulins, by M. D. Prager and J. Bearden . 575
Immune hemolysis, by S. N. Swisher 99
Lattice formation in complement fixation: Studies with univalent rabbit antibody, by H. H. Fudenberg, *et al.* 575
Lesions in erythrocyte membranes caused by immune haemolysis, by T. Boros, *et al.* 99
Rate studies in immune hemagglutination, by T. K. Ming, *et al.* 481
The nature of antiglobulin reactivity of antibody to penicillin, by K. C. Watson 99
Uptake of γ-globulin and complement by red cells exposed to serum at low ionic strength, by P. L. Mollison and M. J. Polley 481

Leukocytes and Platelets

Evaluation of lymphocyte transfer test in normal and uraemic subjects, by J. M. Bridges, *et al.* 99
Leucocyte antibodies in serums of pregnant women. Serology and clinic II, by K. G. Jensen 294
Platelet sequestration in man. I. Methods. II. Immunological and clinical studies, by R. H. Aster and J. H. Jandl 294
Preservation of morphological integrity and clot retracting activity of human platelets after freezing, by C. Bishop 100
Properties of phytohaemagglutin, by R. L. Kolodny and K. Hirschhorn 99
Serologic typing of human lymphocytes with immune serum obtained after hemografting by R. L. Walford, *et al.* 99
The influence of maternal leucocyte antibodies on infants, by H. Abildgaard and K. G. Jensen 294

Methods

A simple method of separating agglutinated and free erythrocytes, by P. H. Renton and J. A. Hancock 297
A simple method of separating erythrocytes of different ages, by P. H. Renton and J. A. Hancock 297
Short term storage of enzyme-treated cells, by D. A. Webb 297

Platelets

Reduced platelet survival in patients with Starr-Edwards prostheses, by H. Lander, *et al.* 572

Serum Proteins

Antibodies to gamma-globulin in infants and children exposed to isologous gamma-globulin, by E. R. Stiehm and H. H. Fudenberg .. 575
Frequency of the Anti-Gm and Anti-D serums necessary for the determination of the Gm groups, by R. Audran 575

Storage and Transfusion

A contribution to the comparative chemical and biological assay procedures for plastic containers used for blood preservation, by G. Roggen, *et al.* 573
An evaluation of methods for measuring operative blood loss, by R. C. Moore, *et al.* 574
Assay for hexokinase activity in intact red cells and its alteration on storage, by C. Bishop .. 100
Autotransfusions of repeated treatments with the artificial kidney, by R. Hansson, *et al.*... 574
Chemical and biological test-methods applied to plastic products used in transfusion equipment, by B. Gullbring, *et al.* 573
Cold or warmed blood for massive transfusions, by C. P. Boyan 100
Control of acidosis and the use of titrated ACD blood in open-heart surgery, by G. G. Nahas, *et al.* 296
Glycerol treated human red cells frozen with liquid nitrogen, by H. W. Krijnen, *et al.*... 480
Hemodynamic effects of blood transfusion in chronic anemia, by M. Duke, *et al.* 480
Metabolic changes associated with hemorrhagic shock, by O. Schweizer and W. S. Howland .. 296
Particle formation in dextran solutions, by R. A. Ewald, *et al.* 480
Physiologic properties of glycoalginate, a new Japanese plasma-volume expander, by G. P. Murphy, *et al.* 480
Platelet microemboli associated with massive blood transfusion, by E. P. Jenevein, Jr. and D. L. Weiss 296
Pooled human plasma as a volume expander, by R. S Hillman 480
Preservation of blood by freezing: A review, by H. T. Meryman 574
Recent difficulties with frozen glycerolized blood, by R. Valeri and M. E. Henderson .. 479
Relationship between glutathione stability and *in vivo* survival of autologous, deglycerolized, resuspended red blood cells, by C. R. Valeri and L. E. McCallum 574
Storage of human red blood cells. II. The effect of *p*H and of the addition of adenine, by C-H. de Verdier, *et al.* 100
The hydrogen ion concentrations and erythrocyte glycolysis, by S. Minakami, *et al.* 574
The stability of glucose-6-phosphate dehydrogenase and 6-phosphogluconate dehydrogenase in human erythrocytes and hemolysates during storage, by O. J. Mellbye and D. Scott 479
Transfusion of erythrocyte-glycerol mixtures after prolonged storage at low temperatures, by H. A. Sloviter and R. G. Ravdin 479
Transient auto-antibody formation in a case of open-heart surgery with no signs of increased red-cell destruction, by M. Hjelm, *et al.* 297

Transfusion Reactions

Data on the determination of SGOT and SGPT activity in donor blood for the possible prevention of posttransfusion hepatitis, by K. H. Brandt *et al.* 573
Immunization against serum hepatitis from blood transfusion, by J. G. Allen 573
Influence of vasoconstrictors and vasodilators on disseminated intravascular coagulation in irreversible hemorrhagic shock, by M. J. Elovitz *et al.* 572
Posttransfusion anicteric hepatitis, by C. L. Hampers *et al.* 480
Risk of posttransfusion viral hepatitis, by G. F. Grady and T. C. Chambers 480
